Notification of Price Change for DuPont Performance Building Solutions Spray Polyurethane Products

Dear Valued Customer:

As you know, we proudly manufacture our one and two-component spray foam products in the United States, utilizing raw materials and components sourced globally. We are writing to share an update regarding current conditions affecting global transportation and operating costs. Ongoing cost increases such as for raw materials, energy, and transportation are impacting the cost of our product's ingredients and components. As a result, we are taking the following actions:

Effective June 27, 2026, or as otherwise specified in your agreement with DuPont, the prices for our Spray Polyurethane products in the United States (listed below) will increase by the percentages outlined below. These price increases will be effective for all new orders shipped on or after June 27, 2026.

DuPont Product	Percent Increase
Froth-Pak™ Refills (17, 27, 60, 120 GAL)	5%

To manage orders for these products during this period, DuPont reserves the right to limit the quantity purchased in advance of this increase.

We remain committed to providing quality products that continue to evolve with your business needs, and best support current and future market trends.

Thank you for the opportunity to supply your needs and for your continued support and collaboration.

Sincerely,

Lori Louthan
Global Business Director, Home Improvement
