RE: Bosch Price Adjustment Notification

Bosch is committed to providing the highest quality products at a competitive price to our customers. We greatly value your ongoing engagement and the trust you place in our brands.

Over the past several months, we have experienced significant and sustained increases in the cost of key raw materials—most notably but not limited to copper, lithium, aluminum, carbide, and cobalt. These inputs are critical to our product portfolio, and their continued volatility and upward pricing pressure have materially impacted our cost structure.

Despite our ongoing efforts to offset these increases through productivity improvements, sourcing optimization, and cost control measures, the scale and persistence of these cost pressures now necessitate a pricing adjustment.

As a result, prices across select product categories will increase in accordance with the transition approach described below. A detailed price list outlining the specific changes will be shared with you directly in the coming days. The referenced average increase is provided for planning purposes and does not represent a commitment as to pricing for any specific product, product category, or customer.

To help you prepare, we are offering a transition period during which current pricing will remain in effect for orders subject to the rules outlined below. This transition approach is intended as a temporary business accommodation and does not modify Bosch’s Standard Terms & Conditions of Sale. Order pricing will be applied consistent with Bosch’s applicable Standard Terms & Conditions of Sale, including pricing in effect at the time a Purchase Order is received.

- The new prices will apply to all Purchase Orders received by Bosch beginning June 1, 2026.
- Orders placed prior to June 1, 2026 for immediate delivery will receive the current price.
- Orders placed prior to June 1, 2026 for future ship dates on or after June 1, 2026 at the current price will be rejected.

- Any unfilled or unshipped orders placed for immediate delivery prior to June 1, 2026 will ship at the old prices.
- New UP pricing will be shared with you directly, and will be effective June 1, 2026.
- Updated MSRP, which are non-binding suggestions only, will also be made available and will be effective June 1, 2026.
