

DISTRIBUTOR PRICE INCREASE ANNOUNCEMENT

June 16, 2026

Dear Valued Customers,

With the ongoing volatility in the global markets, our raw material prices have increased significantly in the past year. These costs impact overall input costs specifically in the PVC, aluminum and transportation charges (ie: ocean freight, fuel and related costs). We regrettably have to implement an overall increase effective on **Monday July 13, 2026** with a 30 days notice as of today.

The following items have been impacted to all of our Canadian and US customers.

Product Line	Percentage Increase
SAGIWALL & SAGIREV – All PVC Panels and related accessory trims	≈5%
SAGIWALL & SAGIREV – Aluminium accessories trims	≈2%
SAGIBATTEN – Aluminum Battens and related accessories	≈9%
SAGIBOND – Fireguard, Hexacore and Slimshield ACM Panels	≈9%

UNITED STATES CUSTOMERS

A 10% Global Tariff Surcharge will remain in effect on all orders shipped from our Florida distribution facility. For U.S. orders shipping from our Edmonton, Alberta distribution facility, the existing Global Tariff Surcharge will remain unchanged at this time.

While current market conditions and tariff-related costs would support an increase to the previously announced 15% surcharge, we have elected to cap the surcharge at 10% at this time in an effort to minimize the impact on our customers.

We will continue to monitor market conditions and U.S. trade policy closely. As this surcharge is directly tied to current tariff and import-related costs, it will remain a separate line item and may be adjusted or removed should conditions improve.

Should you have any questions or require additional information, please do not hesitate to contact your SAGIPER representative.

Thank you for your continued business and support.

Sincerely,

A handwritten signature in blue ink, appearing to read "Mitch Freire", written over a horizontal line.
