Price Increase Announcement – Effective September 28, 2026

Dear Valued Customer,

Effective September 28, 2026, CEMCO will implement a price increase on all steel-based products across all markets.

U.S. steel mills have announced another round of price increases for October shipments, following their nine previously announced increases this year. Continued constraints on domestic steel availability are allowing mills to sustain upward pricing pressure.

Mills are also increasing coating premiums, which are raising costs for G-60 partition components and G-90 structural framing products. In addition, elevated fuel prices continue to increase both inbound and outbound freight costs.

To address these rising costs, CEMCO must implement corresponding price adjustments on all steel-based products shipping in October. Although the duration of the current pricing cycle remains uncertain, we will continue to monitor market conditions and keep you informed of any significant changes.

As always, updated price sheets will be available from your sales representative during the week prior to the effective date of the increase.

We appreciate your continued business and support.

Sincerely,

CEMCO Sales Management Team
