

October 9th, 2026

To Our Customers,

Effective **Monday, November 9th, 2026**, USG will increase prices on the following products:

- All **Commercial and Retail ceiling panels** will increase up to **8%**.
 - Including Mineral Fiber, Fiberglass, Cast and Gypsum Lay-In panels.
- All **Suspension Systems** will increase up to **10%**.
- All **Metal USG Ceilings Plus® Design Solutions** and **USG Specialty products** will increase up to **5%** (Excluding Compasso™ Elite, Barz® and Illusions®).

Note: USG Ceilings Plus® Custom products are quoted by project and will not be impacted by this increase.

This price increase is driven by the continued inflation of raw materials and the escalation of energy costs.

Additionally, due to ongoing global conflicts and the significant rise in transportation and freight costs, USG will continue its fuel surcharge policy on all prepaid shipments and increase the set dollar amount as outlined below. The surcharge will be reviewed regularly and adjusted as market conditions improve.

Order Type	Weight Range	Surcharge
Partial Truckload	5,000 – 9,999 lbs.	\$150
Partial Truckload	10,000 – 29,999 lbs.	\$250
Full Truckload	30,000 lbs. or more	\$500

Grid shipments will be managed as necessary to ensure equitable distribution. Your USG representative will contact you to discuss pricing in your market.

As always, we appreciate your business and look forward to our continued partnership.

Sincerely,

Mike Toole
Vice President, Sales
USG Ceilings

COVERAGE AREA: All United States – Commercial and Retail
